## Venture Event Medical Management

Organising a mass participation charity event for over 11,000 people is a daunting prospect in all respects but of paramount importance to us is the safety and well being of everyone taking part including the hundreds of volunteers and tens of thousands of spectators.

Venture Event Medical Management provides us with a comprehensive end to end medical service which takes away all of the hassle. From their initial comprehensive yet pragmatic assessment through to first class flexible delivery on the day and detailed after event feedback they provide a highly professional service which we would readily recommend to others.

As we expand Jane Tomlinson's 'Run For All' brand and undertake more events in various cities we will definitely be including Venture Event Medical Management in our plans as the company has become a valuable and intrinsic component of our delivery process.

Yours sincerely

*Graeme Hodgson*
