October 2009

VENTURE event medical management, is led by two very experienced individuals, Carol and Dennis and through their meticulous approach to planning, have been most successful in delivering well managed medical services at both many small and large events run by Leeds City Council. Their knowledge and tailored resourcing have been excellent and this has ensured all our events have been covered effectively.

I have known and worked with Carol and Dennis for many years and over the past two years since the company was formed, I have used the services of VENTURE event medical management and throughout this time I have been continually impressed by their personal and reliable service.

I feel confident when I receive their detailed Medical Plans and risk assessments, I am reassured that their ongoing experience gives them a very professional view to service delivery, and this is reinforced by a history of events being successfully managed, and always under their personal supervision and scrutiny.

The vast number of events provided by Leeds City Council's Events Team are both varied and diverse, from Opera and Party in the Park, to music concerts in Millennium Square, to Leeds Pride, city centre runs and the Ice Cube, all attracting large crowds. VENTURE has provided a service to these, together with many smaller events and has ensured all necessary facilities and staff to ensure the safe and professional medical service delivery.

I have no hesitation in recommending the company and enjoy the excellent working relationship I have with the confident, trusted and helpful team at VENTURE.
